Notes:

- 1.The value of power consumption,air volume and noise are specified at the static pressure of 0 Pa.
- 2.The value of air volume is the mean value which is measured by our company.
- 3.The value of noise level is measured at 1m apart from the left,the right and the front of product,then get the average of three values.
- 4.The value of noise level is A weight average sound pressure level,the mean value is measured by our company.
